

STEHLE MICRO LLC.

Preparation Check Points

Please follow these instructions carefully to get the best possible result out of your scalp treatment.

No Alcohol for 24 hours before or after treatment (may interfere with healing and pigment retention)

- ❖ **May take mild over the counter pain relief 30-60 minutes before each session**

For Dry/Flaky/Itchy Scalp

- **Olive Oil* Scalp Treatment**
 - **1 Tbsp Olive Oil mixed with 2-4 drops Tea Tree oil on your scalp every night for 1 week before your session**
 - ***Do not use Coconut oil on scalp as it is a pulling agent and can pull pigment from your scalp.**

For Color Treated Hair:

- **No hair color or bleach on scalp 7-14 days prior to each treatment**
- **No color on scalp 14-30 days post treatment**
- **No bleach on scalp after treatment... Ever.**

For Hair Systems:

- **Do not fix the prosthesis with glue for a minimum 1 month prior to treatment**
- **If applicable (based on scalp health) the client wants to keep having a clipped/lightly taped hair system during the day during but must take it off at night.**
- **When the hairpiece is not worn, a pharmacological treatment recommended by your doctor should be applied. This treatment often involves an ointment with 1% cortisone content.**
